Details of Dataset

- ❖ **Dataset:** Startup Success Prediction
- ❖ **Source:** Kaggle
- ❖ **Number of Records (Rows):** 923 startup companies
- ❖ **Number of Features (Columns):** 49
- ❖ **Key Attributes / Features:**
 - **Funding details** – amount, rounds, and investors
 - **Industry and market type** – identifies business domain
 - **Team size & company age** – indicates experience and resources
 - **Geographic location** – country or region of operation
 - **Milestones achieved** – product launches, partnerships, acquisitions
- ❖ **Target Attribute:** Startup status (successful/acquired vs failed/closed)
- ❖ **Suitability of Dataset:**
 - The dataset contains historical startup records with labeled success outcomes.
 - It includes numeric features (funding, team size, age) and categorical features (industry, market, location).
 - Key features like funding, team size, and industry make it directly relevant to our project title.
